Chapter 5 Test- Natural Laws and Car Control - Driver Ed ...

The laws of nature and physics are present at all times and must be kept in mind while operating a vehicle. If you try to break them, you will end up losing control of your vehicle and perhaps cause an accident that could have been prevented. By misjudging natural forces, you can be pulled out of a curve and lose control.

Physics and Natural Laws of Driving | Safe Driving Habits ...

Natural Laws and Driving an Automobile. There are three basic ways that we control the motion of our cars. They are speed, braking, and steering. Each of these functions is affected by the laws of

gravity, centrifugal force, inertia, kinetic energy, and friction. You can not act against these forces, but you can learn what to do if you want to minimize the their effects.

Natural Laws and Driving an Automobile - DriversEd.com

Roll Speed Weight Time between impact and stopping Traction Pitch force is a tilting motion from front to back. A vehicle can pitch due to rapid acceleration or braking. Inertia Objects that are at rest tend to stay at rest and objects that are moving tend to keep moving. When
