In economics, profit maximization is the short run or long run process by which a firm may determine the price, input, and output levels that lead to the greatest profit. Neoclassical economics, currently the mainstream approach to microeconomics, usually models the firm as maximizing profit. There are several perspectives one can take on this problem. First, since profit equals revenue minus ...

On the retail side, one single company, Amazon, currently dominates the market, holding significant market power and a monopsony position (Ritala et al., 2014). Amazon's estimated US market share is now 60% eBooks and 30% physical books. 1 The other 40% of the market of eBooks is divided amongst a range of companies including Apple, Barnes & Noble, Google, Asda and others.

### Servitization, digitization and supply chain interdependency

Capitalism is an economic system based on the private ownership of the means of production and their operation for profit. Characteristics central to capitalism include private property, capital accumulation, wage labor, voluntary exchange, a price system, and competitive markets. In a capitalist market economy, decision-making and investment are determined by every owner of wealth, property ...
