Paul Andersen details the evolutionary processes of speciation and extinction. Stickleback evolution in Lake Loberg is used as example of rapid speciation.

007 - Speciation and Extinction — bozemanscience

The last universal common ancestor (LUCA) is the most recent organism from which all organisms now living on Earth descend. Thus it is the most recent common ancestor of all current life on Earth. The LUCA is estimated to have lived some 3.5 to 3.8 billion years ago (sometime in the Paleoarchean era). The earliest evidence for life on Earth is graphite found to be biogenic in 3.7 billion-year ...

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

Life - Wikipedia

Students complete the rest of the Pedigree sheet with a partner (student work). This allows the students to collaborate with each other searching for the best explanation (SP7), and analyze pedigree charts (SP4). Through the work and conversation, the students are engaging in using the pedigree charts (models) to understand and predict behaviors of biological systems (CCC Systems and System ...
