Arfken And Weber 5th Solutions
Separation of variables is a method of solving ordinary and partial differential equations. For an ordinary differential equation (dy)/(dx)=g(x)f(y), (1) where f(y)is nonzero in a neighborhood of the initial value, the solution is given implicitly by int(dy)/(f(y))=intg(x)dx. (2) If the integrals can be done in closed form and the resulting equation can be solved for y (which are two pretty ...

In mathematics, the Dirac delta function (δ function) is a generalized function or distribution introduced by the physicist Paul Dirac.It is used to model the density of an idealized point mass or point charge as a function equal to zero everywhere except for zero and whose integral over the entire real line is equal to one. As there is no function that has these properties, the computations ...
