Free Grammar Check

In formal language theory, a context-free grammar (CFG) is a certain type of formal grammar: a set of production rules that describe all possible strings in a given formal language. Production rules are simple replacements. For example, the rule → replaces with .There can be multiple replacement rules for any given value. For example,

Context-free grammar - Wikipedia

In my mother tongue both for and to have the same meaning, therefore it is hard for (is it being correctly used here?) me to know when I should use one instead of the other. After some google's searches into the question I verified that the former must be used when we want to refer to a purpose or when something is to the benefit of somebody. The latter is used when something is moved or ...
