I have a string, "004-034556", that I want to split into two strings: string1="004"; string2="034556"; That means the first string will contain the characters before '-', and the second string will contain the characters after '-'.I also want to check if the string has '-' in it. If not, I will throw an exception.

How to split a string in Java - Stack Overflow

Many Enterprise-grade management solutions exist out there: VMware vCenter, Citrix XenServer/Center, Microsoft Hyper-V to name a few. Regardless of that, none of these solutions were fitting to solve a very simple problem: manage a dedicated server for virtualization, under the OS of our choice, in a free and open way.
